Description of Course: The failure of a building or building components under fire conditions is a leading cause of fire fighter death and injury. The ability to recognize and locate relevant information about a building before a fire, and to "read" a building during the course of a fire incident, are essential survival skills. This course gives the student the ability to accomplish these tasks when confronted with a building of fire-resistant or non-combustible construction. The unique problems of conducting emergency operations in buildings under construction are also addressed.
